Classification of the Drone Elios 3

Dear Sir,

We refer to your e-mails concerning the classification of your drone Elios 3.

Based on the documents you sent us on June 17, 2022, and your clarifications of July 5, 2022, we can confirm that the Elios 3 drone is not covered by the annexes of the Goods Control Ordinance (GCO; SR 946.202.1) and can therefore be exported without SECO authorization.

Exports and transactions with states, companies and persons subject to Swiss sanctions are expressly reserved.

This evaluation of the licensing requirement is based on the currently valid annexes of the Goods Control Ordinance. These annexes are subject to periodic changes. Should the drone be modified for military use, a reassessment would be necessary concerning Annex 3 of the Goods Control Ordinance.

Yours faithfully

Peter Bracher
Licensing Officer
